A bona fide attempt was made to present a copy of the application papers (specification, including claims, drawings and oath or declaration) to the non-signing inventor Don Wahlstrom for his signature. (M.P.E.P. 409.03(d)). The exact facts which are relied upon to establish this bona fide attempt to have the joint inventor, Don Wahlstrom, sign the Declaration are as follows:

a. On August 2, 2004, I sent a letter via Federal Express to Mr. Donald P. Wahlstrom at the following address:

Mr. Donald P. Wahlstrom

CROSS-REFERENCE TO RELATED APPLICATION(S)

- [0001] This application claims priority to U.S. Provisional Patent Application number 60/399,042 filed July 25, 2002, incorporated herein by reference.

BACKGROUND

- [0002] Embodiments of the invention relate generally to devices and methods for assigning priority to messages or transmissions in a network.
- [0003] The need and desire for users, such as consumers, single home small office (SOHO) users, small businesses, etc., for telecommunications services continues to increase dramatically. Users desire faster Internet connections, facsimile service, telephone service, etc., in order to take advantage of the connectivity that each of these services provides. In response, many telecommunications companies have created a large amount of bandwidth capacity on long-haul transmission routes (the backbone network infrastructure) through the use of fiber-optic networks, which can transmit data at speeds in excess of 10 gigabytes per second (Gbps). A disconnect exists, however, between the backbone networks and the local loops of local exchange carriers. The connection between the local exchange carriers and the end users, particularly smaller users, is still mostly twisted pair copper cable instead of high-speed fiber-optic cable. This failure to provide high-speed connections for "the last mile" has resulted in a bandwidth bottleneck between the increasing data needs of users and the high-speed backbone network.
- [0004] One solution to this bottleneck is to lay high-speed fiber-optic cable directly out to individual users. This solution is both very expensive and slow to implement. Another solution is to utilize existing telephone lines, such as with

**DECLARATION OF FACTS UNDER 37 CFR 1.47(A)**

Sir:

I, Christopher Daley-Watson, hereby declare and say that:

1. I am the Attorney of Record at Perkins Coie LLP in the prosecution of the above patent application.
2. I am familiar with and have first-hand knowledge of the facts recited below.
3. The above-identified application is a continuation of U.S. Provisional Application 60/399,042. This provisional application included the name of Don Wahlstrom as a joint inventor, as well as a copy of an Assignment signed by Don Wahlstrom, the non-signing inventor. (See Exhibit A, a copy of the Assignment executed by Don Wahlstrom on October 22, 2001.)

4. A bona fide attempt was made to present a copy of the application papers (specification, including claims, drawings and oath or declaration) to the non-signing inventor for signature. (M.P.E.P. 409.03(d)). The exact facts which are relied upon to establish this bona fide attempt to have the joint inventor, Don Wahlstrom, sign the Declaration are as follows:

a. On August 2, 2004, I spoke with Don Wahlstrom, the non-signing inventor, and based on our conversation it appeared he was willing to sign the declaration.

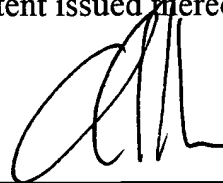

b. On September 14, 2004, I was informed by the legal secretary working on this patent application, Lana Anthony, that despite several attempts since my conversation with Don Wahlstrom on August 2, 2004, he has not executed the Declaration, nor made any additional contact. Based on this knowledge, I sent email correspondence to Don Wahlstrom requesting he execute and transmit the Declaration. (See Exhibit B). No response was received, nor a response indicating that the email correspondence could not be delivered, thus do I presume my email was delivered.

5. Based on the foregoing, and copies of the documentary evidence submitted herewith, it is clear that the inventor's conduct constitutes either a refusal to sign or an unavailability of an inventor under 37 C.F.R. 1.47(a).

The undersigned declares that all statements made herein of his own knowledge are true and that all statements made on information and belief are believed to be true; and further, that these statements were made with the knowledge that willful false

statements and the like are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or of any patent issued thereon.

Hi Don:

My secretary brought it to my attention today that we have yet not received the signature documents for this invention of yours. We must file a response by Monday next week (Sept. 20).

Please let me know if you will be sending us the signed documents in time for our deadline. As mentioned previously, you need only sign and date the documents; they do not have to be notarized. We will also be happy to send a messenger if this works best for your schedule. If you will not be sending the documents, then we will need to take other measures, but need to know how to proceed now.

The courtesy of a reply would be greatly appreciated Don. Thank you for your help.

You are correct.

Thanks so much for your cooperation Don.

Hello Lana,

When I spoke to Christopher Daley about the papers I asked him if I needed to have them notarized and he said no, my signature was enough. The paper I received and now your email state that I do indeed need to have them notarized. Which is it? BTW, I don't have access to a notary.
